

MECHANIC / MAINTENANCE ENGINEER

Teamworks Karting is one of the UK's fastest growing indoor karting companies, and requires a mechanic/maintenance engineer to manage our busy workshop at our recently-acquired Mansfield circuit.

You will be responsible for helping to maintain a fleet of petrol 200cc adult karts and 160cc cadet karts, and our circuit's building & facilities.

Your responsibilities will include:

- Maintaining the fleets of karts
- Maintaining the laser tag equipment (training will be provided)
- Building and track maintenance
- Supervising daily safety checks of track and karts.
- Enforcing required maintenance regimes and recording activity on the computer based workshop system.
- Ordering of required spares, from manufacturer as well as alternate sources.
- Attending the weekly circuit management meetings to report on availability and understand the workload requirements for the coming weeks
- Organise and carry out general building and facility maintenance as required.
- Supervise and participate in facility improvement projects.
- Liaise with other track operations to ensure best practice across the group.

You are a dynamic, engaging person, with an excellent attention to detail. You should have at least 2 years general mechanic experience. You should have examples of previous work on cars, karts or building maintenance.

Hours: 30 hours per week, to include one weekend day per week. Additional hours may be available according to season/demand.

BENEFITS:

Up to £10 per hour plus 28 days paid holiday.

TO APPLY:
